

KELLY ALISHA TOBIN INTERNSHIP SUMMER 2023

About the Kent Land Trust

The Kent Land Trust (KLT) is a local nonprofit land trust in the hills of Northwest Connecticut. We are dedicated to preserving natural resources through land protection, stewardship, public outreach and education, and research. KLT is volunteer-led by Kent residents who serve on its board, committees, and as volunteers. Our staff include a part-time Executive Director, Land Manager, Program Manager, and Office Manager. Our focus on community service leads us to partner with many local and regional nonprofits and local government.

Internship Description

Each summer, the Kent Land Trust offers a paid college internship honoring Kelly Alisha Tobin. This conservation-focused program fosters personal and professional growth through hands-on experiences not typically available in an academic setting. KLT has been fortunate to work with interns whose work has had a meaningful impact, both on their own growth and on KLT's mission. Several of KLT's interns have gone on to further study and work in the conservation field.

The Summer 2023 Kelly Alisha Tobin Internship will run for 8-10 weeks, 35 hours per week, from approximately mid-May through early August. Pay is \$15 per hour.

Past Intern Spotlight - Alison Robey: Alison completed her internship in summer 2017. She helped design and build trails on two KLT preserves, banded purple martins as part of KLT's ongoing participation in the PUMA program, and upgraded our kiosks by adding QR code-activated links. She also partnered with AmeriCorps volunteers on local conservation projects. Alison is now pursuing a PhD in Ecology and Evolutionary Biology at the Yale School of the Environment, where she researches using ecological theory to better predict the risk that climate change poses to different communities.

Duties and Expectations: Depending on your project (see below), duties will vary. Since we are a small staff, flexibility is required. We meet weekly as a team to share updates, coordinate projects, and brainstorm about newly identified needs and opportunities. Training in areas related to the job

responsibilities (e.g., basic mapping applications, plant identification and ecosystems studies) may be available if desired. Ability to work occasional weekends or evenings is helpful. All interns must:

- Have a valid driver's license and their own vehicle
- Be able to work independently and as part of a team
- Be able to perform moderately strenuous manual labor
- Be comfortable working outside and walking on uneven ground
- Be proficient on a computer.

Internship Projects: If you have an idea for a project that will fit our mission and advance your professional development, pitch it to us! Some possible project topics include:

- Pollinator pathways -- Expand our current pollinator pathways project initially implemented by a past summer intern. This could include fieldwork on habitat restoration, community outreach, and educational programming.
- Equity in public access -- We are ready to install a grant-funded boardwalk providing access to the Housatonic River at the site of KLT's office. We would love for an intern to help us realize the first all-access trail in the town of Kent.
- Land conservation and affordable housing -- Explore the opportunities and challenges associated with bringing together the land conservation and affordable housing movements. Potentially partner with other local and regional organizations on this important topic.

How to Apply: To apply, send a cover letter and resume to benjaminm@kent-school.edu. In your cover letter, be sure to introduce yourself, explain your academic and professional goals, and propose one or more projects that will support your growth and KLT's mission.
